Firmware Upgrade Procedures

Upgrade through user interface

1. Log into to the router's configuration page (default IP is 192.168.10.100 or http://tew-921dap)
2. Click on the **Management** and click on **Upload Firmware**.
3. Depending on your web browser, in the **Upload Firmware** section, click **Browse** or **Choose File**.

4. Navigate to the folder on your computer where the unzipped firmware file (*.bin*) is located and select it.
5. Click **Apply**. If prompted, click **Yes** or **OK**. Wait until the firmware upload completed and the device reboots.
6. To finalize the firmware update process you must reset the AP to factory default settings.
7. Log back into the AP, click on the **Tools** and **Settings Management** section. Under Restore Factory default click on **Restore Device**.

Note: *You will need to reconfigure and access the router's management page using the predefined settings found on the top or bottom labels.*
