**Q1: How come I cannot see any light from any of my LED's?**

**A1:** Your TEG-S3000i is not getting any power. Make sure that your surge protector or your outlet is getting power and make sure that the AC Power cord is properly connected to your TEG-S3000i.

**Q2: I changed my IP settings to 192.168.16.222 to access the switch, but I still cannot get into the Web configuration page. What should I do?**

**A2:** Make sure there is no other network device using the same IP address. Afterwards, consult the User's Guide to access the switch through the Console Port. Once you reach the command line interface, perform a factory reset and try again.

**Q3: I performed a factory reset on the TEG-S3000i, but I still cannot access the web configuration page. What should I do?**

**A3:** If you are configuring more than one TEG-S3000i, then it is possible that you are experiencing IP conflict between these two switches. Please configure each switch one at a time, and make sure you assign a unique IP address to each switch.
