TEW-510APB F.A.Q.

Q: How do I configure the Access Point through the web-based configuration?

A: Open your web browser and type the IP address of the TEW-510APB in the address bar. The default IP address is 192.168.1.250. At the login, enter your username (admin) and password (admin).

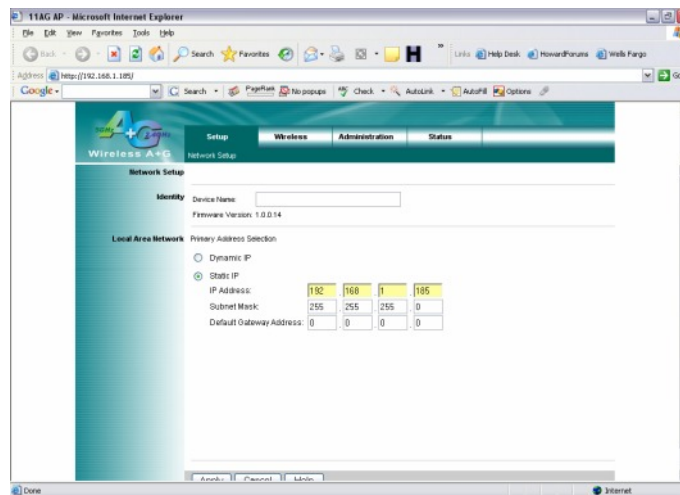

Q: What is the default IP address of my Access Point?

A: The default IP address of the TEW-510APB is 192.168.1.250.

Q: How do I change the IP address of my TEW-510APB?

A: **Step 1.** Open your web browser and type the IP address of the TEW-510APB in the address bar. The default IP address is 192.168.1.250. At the login, enter your username **(admin)** and password **(admin)**.

Step 2. Click on the Network setup tab at the top of the page.

Step 3. Change the IP address to the desired IP address and click **"Apply"**.

## Q: What is the default username and password for the TEW-510APB?

A: The default username and password are both "admin".

TEW-510APB F.A.Q.

Q: How do I change the password and username on my TEW-510APB?

A: **Step 1.** Open your web browser and type the IP address of the TEW-510APB in the address bar. The default IP address is 192.168.1.250. At the login, enter your username **(admin)** and password **(admin)**.

Step 2. Click on the **"Administration"** tab at the top of the page.

Step 3. Enter the new Administrator ID and/or password. Click Apply to save the settings.

Q: What can I do if I forgot my password or want to reset back to factory defaults?

A: Locate the reset button on the back of the unit. Press and hold it in for approximately 15 seconds.

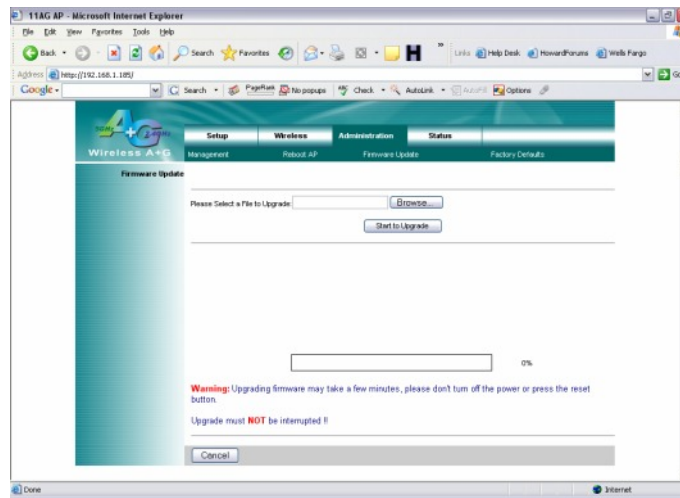

Q: How do I upgrade the firmware on my Access Point?

A: DO NOT upgrade firmware on any TRENDnet product using a wireless connection. Firmware upgrades over wireless connections may damage the product. Please perform firmware upgrades with "wired" network connections only.

Step 1. Open your web browser and type the IP address of the TEW-510APB in the address bar. The default IP address is 192.168.1.250. At the login, enter your username **(admin)** and password **(admin)**.

Step 2.   Click on the **"Administration"** tab at the top of the page then on firmware update.

Step 3.   Click on **"Browse"** next to the box under the **"Firmware Upgrade"** section. Locate and select the firmware file that you previously downloaded and extracted.
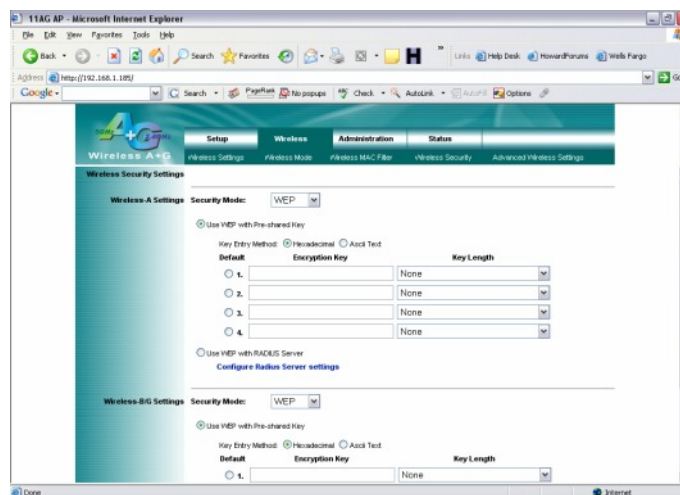

Step 4.   Click on **"Upgrade"**. It will take approximately 30 seconds to upgrade the firmware and the access point to restart.

Do NOT interrupt the firmware update process. Doing so may damage the product.

Q: How do I enable encryption on my Access Point?

A: **Step 1.**   Open your web browser and type the IP address of the TEW-510APB in the address bar. The default IP address is 192.168.1.250. At the login, enter your username **(admin)** and password **(admin)**.

Step 2.   Click on the **"Wireless"** tab at the top of the page then go to wireless security and enable either the Wireless A or Wireless B/G security.

**Step 3.**   Choose your Authentication type and enter your key settings.

TEW-510APB F.A.Q.
