2. Порядок установки

примечание: Совершенно новый жесткий диск рекомендуется сначала отформатировать. Подробнее об этом можно узнать в вопросе 2 из указаний по устранению неисправностей.

Подключение дисковода SATA

1. Присоедините кабель SATA из комплекта к гнезду SATA на накопителе на жестких дисках SATA и переходнику.
2. У кабеля питания жесткого диска присоедините миниатюрный 4-контактный конец к разъему постоянного тока адаптера, а силовой гнездовой разъем SATA с 15 контактами к 15-контактному разъему на жестком диске. Далее перейдите к шагу 5.

Примечание: Если у жесткого диска SATA уже имеется 4-контактный силовой разъем, используйте тогда его. Для соединения с жестким диском IDE и SATA, используя 4-контактный силовой разъем, потребуется 4-контактный силовой разъем типа Y, чтобы сделать из одиночного 4-контактного силового разъема двойной 4-контактный разъем.

Подключение дисков IDE

3. Присоедините устройство IDE к IDE-разъему адаптера. Для присоединения к жесткому диску 3,5" IDE или приводу CD/DVD нужно сначала присоединить преобразователь из 2,5" в 3,5" IDE.

4. Если подключено устройство 3,5" или 5,25" IDE, используя силовой кабель из комплекта, присоедините миниатюрный 4-контактный конец к разъему DC адаптера, а 4-контактный гнездовой конец к силовому разъему на дисковом IDE.

5. Присоедините одиночный разъем вывода DC (пост. ток) силового адаптера к гнезду DC IN на адаптере. Затем присоедините питающий провод из комплекта к силовому адаптеру, а другой конец к гнезду AC.

Примечание: жесткий диск, присоединенный к устройству TU2-IDSA, должен быть отформатирован в системе FAT-16 или FAT-32, чтобы Windows 98SE или Windows ME распознала его.

Примечание: Пользователям Windows 98SE нужно прочесть вопрос 1 из раздела «Устранение неисправностей». Пользователям Windows XP/2000/ME нужно перейти к шагу 6.

6. Присоедините разъем USB к порту USB на компьютере. Драйверы установятся автоматически.

7. Двойным щелчком выберите значок **Мой компьютер**.

8. Должен отобразиться внешний жесткий диск (диски). Если ваш жесткий диск совершенно новый, нужно прочесть вопрос 3 из раздела «Устранение неисправностей».

Hard Disk Drives

Q1: How do I install the TU2-IDSA on my Windows 98SE machine?

A1: First, download the Windows 98SE drivers from www.trendnet.com. Second, uncompress the drivers. If you do not have a compression program such as WinZip, you need to download and install this program first. Third, **double-click** on the **Setup** icon. Click **OK** when the Setup successful! Window appears. Fourth, continue on to step 6 in Section 2.

Q2: My computer does not recognize the TU2-IDSA. What should I do?

A2: First, verify that the computer meets the minimum requirements as listed in section 1. Second, make sure that you have plugged in the power into the unit and the power cord into an outlet. Third, try plugging the device into a different USB slot on your computer.

Q3: How do I format my brand new hard drive?

A3: For Windows 2000/XP, go to **Start -> Settings -> Control Panel -> Administrative Tools -> Computer Management -> Disk Management**. If the **Initialize and Convert Disk Wizard** appears, click **Cancel**. Right click the **Unknown** drive, click **Initialize** and then click **OK**. Right click on the unallocated region of the hard drive and select **New Partition**. Follow the **New Partition Wizard** instructions then click **Finish**. The hard drive will automatically start the formatting process. For Windows 98SE/ME, right click on **My Computer**, and then click **Device Manager**. Double-click on **Disk drives**, and then double-click on your hard drive. When the hard drive properties window appears, click on the **Settings** tab. Check **Removable** in the **options** section, select an available drive letter for **Start drive letter** and then click **OK**. Click **Close**. Click **Yes** to restart the computer. Double click on **My Computer**, double-click on the hard drive and click **Yes** to format it.

Q4: My computer does not recognize my hard drive(s)? What should I do?

A4: First, verify that the device is installed properly. Right click on **My Computer Properties**. Click on **Hardware**, then **Device Manager**. Double click on **Universal Serial Bus Controllers**. Make sure that **USB Mass Storage Device** is listed and there is no yellow question mark or exclamation point. Second, if you are attaching a brand new hard drive, format the drive. Please refer to question 2 for more information. Third, the hard drive that is connected to the TU2-IDSA must be formatted in FAT-16 or FAT-32 in order for Windows 98SE or ME to recognize it

Q5: Can I connect a SATA drive and an IDE drive simultaneously?

A5: Yes. To connect to both IDE hard drive and SATA hard drive with legacy 4-pin power connector, you need a 4-pin Y type power cable to convert a single 4-pin power connector into a double 4-pin power connector.
