

TV-PC100 USB PC Camera with 100K Pixel Resolution

TRENDnet's TV-PC100 is a USB PC camera with 100K pixel resolution that combines state-of-the-art optical technology and complete audio visual software with an affordable price. There's no additional receiving software required because you can include a video viewer with each message. You can even take a snapshot, send it to your friends over the Internet, and capture the image to make any changes. It even lets you build and share a Video-Phone Album. In Video Conference mode, you can do one-on-one chats or full video meetings with Group Chatting features. Get closer to family and friends with TRENDnet's TV-PC100 for truly memorable communications.

FEATURES
