3) To save a configuration file click on the "Save" button. It will prompt you to save the file. The default name of the file is "config.bin".

Click on "Browse" under the "Load Settings" field to load a previously saved configuration file. Locate and select the previously saved "config.bin" file and click on "Load".

**Q**: How do I upgrade the firmware on my TEW-452BRP?

A:

**DO NOT upgrade firmware on any TRENDnet product using a wireless connection.** Firmware upgrades over wireless connections may damage the product. Please perform firmware upgrades with "wired" network connections only.

Click here to download the firmware. Save it to your desktop and extract it.

1) Open your web browser and type the IP address of the TEW-452BRP in the address bar. The default IP address is 192.168.1.1. At the login, enter your username (admin) and password (admin).

2) Click on "Tools" on the left hand side and then click on "Firmware" at the top of the page.

3) Click on "Browse" next to the box under the Upgrade Firmware section. Locate and select the firmware file that you previously downloaded and extracted.

4) Click on "Upgrade". It will take approximately 30 seconds to upgrade the firmware and the access point to restart.

Do NOT interrupt the firmware update process. Doing so may damage the product.

**Q**: How do I enable encryption on my TEW-452BRP?

A:

- 1) Open your web browser and type the IP address of the TEW-452BRP in the address bar. The default IP address is 192.168.1.1. At the login, enter your username (admin) and password (admin).
- 2) Click on "Wireless" on the left hand side and then click on "Authentication" at the top of the page.
