

F.A.Q TEW-P1PG

Q: Why doesn't PS-Utility detect my print server?

If you are using Windows XP you will have to disable the built in firewall. But for all operating systems you have to disable any other form of firewall software such as Norton Internet Security, Black Ice, and ZoneAlarm.

Q: How do I change the IP address of my print server?

Device Name	Setup Wizard	Update Firmware
PS-D56EC6	Change IP Address	Factory Reset
	Show Web Setup	Print Test
	_ Information	
	MAC Address 00 ff	45 d5 6e c6
	IP Address 192.	68.0.1
	Model TE10	0-P1U
	Status Runn	ing
	Firmware 4.06	
	UpTime 0 day	/s, 00:16:29
Discover Device	About	Close

Step 1 Open up the PS-Utility and click on Change IP Address.

Step 2 Change IP Address:

Click this button to bring up the following dialog box, allowing you to change the IP Address. In this dialog box, you can select either *Manually Assign* or *DHCP Assign Automatically*. When completed, click **OK**.

Change IP Address		×
• Manually Assig	n	
IP Address	192 . 168 . 0 . 1	
Subnet Mask	255 . 255 . 255 . 0	
Default Gateway		
O DHCP Assign A	utomatically	
ОК	Cancel	

Q: How do I find the Port Name of the Print Server?

Mar. 17, 2006

First, launch your web browser (such as the Internet Explorer 6.0 used in this manual). Then, type *http://192.168.0.1* (the default IP address) in the Address bar and press [Enter] to enter the Management screen of the Configuration Utility. Or use the IP address that you manually assigned to the Print Server. Click on System and the Port Name is the PS-xxxxxx-P1, x being the actual number listed in the Port Name box. Please write this information down on a piece of paper for future reference.

TRENDware, USA		Managem	ent Configuration	Tools	Help
		Mallagell	ent Conniguration	TOOIS	neip

		PJL Printer	No 💌		

Q: How do I make it Wireless?

Step 1 First you will need to know the SSID of your wireless router or access point, along with the Channel. If you are using any type of wireless security like WEP, you will need to know the key values.

Step 2 Launch your web browser (such as the Internet Explorer 6.0 used in this manual). Then, type *http://192.168.0.1* (the default IP address) in the Address bar and press [Enter] to enter the Management screen of the Configuration Utility. Or use the IP address that you manually assigned to the Print Server.

Step 3 Click on Configuration on the top Menu bar and click on Wireless on the side bar.

TRENDnet	5				TEW-P1PG
TRENDware, USA			Management	Configuration	Tools Help
Configuration	Wireless Interface				
System	Connection Mode		Infrastructure		
Wireless			C Ad-Hoc		
Network	SSID		default	(Manually Input	or Select from List)

You can now input the SSID and Channel or you can click on Site Survey. If you are using WEP Encryption, select the type of encryption and key in the value in Key 1 and Save. Note: The Encryption method and key value is case sensitive and must match your router or access Point.

Step 4 Once you have saved the settings, unplug the Ethernet cable from the back of the Print Server and unplug the electrical power for 15 seconds then plug the power back in. Start the PS-Utility and see if the utility finds the print server. If it does, then the unit is wireless at this point. If not, plug the Ethernet cable back into the print server and confirm the Wireless information.

Q: How do I install my printer on Windows 95/98/ME?

In Windows 98/Me you will need to install the LPR client.

For Windows 98/ME you will also need to know the port name that you are printing to (The Port Name is the PS-xxxxx-P1. X being the actual number listed in the Port Name box).

Installing LPR:

Step 1 Once the file is downloaded and extracted, Go to **Start > Settings > Control Panel >** double-click on **Networks**. Click on **Add**

Step 2 Highlight Client and click on Add.

Select Network Component Type	<u>? ×</u>
Click the type of network component you want to install Client Client Client Client Service	Add Cancel
A client enables your computer to connect to other computers.	

Step 3 Click on **Have Disk** > **Browse**. Browse to the location of the extracted LPR Client.

Select Ne	stwork Client 🗙
	Dick the Network Client that you want to install then click OK. If you have an installation disk for this device, click Hiave Disk.
Madels

	< <u>B</u> ack <u>N</u> ext > Cancel

If you can not find your printer from the list, click on the **Have Disk** button and browse to the printer drivers for your printer (floppy, CD, or downloaded).

Step 5 If you find your printer in the list, click on it and then click on **OK**. Windows will install the drivers.

Step 6 Once the drivers have been installed, click **Finish** to complete the installation. You may be prompted for your Windows CD. If you are prompted for the CD, browse to the Win98 folder on the Windows CD and click on **OK**

Step 7 After the drivers have been installed for your printer, you will be prompted to print a test page. Select **Yes** and click on **Finish**.

Q: How do I install my printer on Windows 2000/XP?

Step 1 Go to **Start>Settings>Printers>Add New Printer** (WinXP - **Start>Printers and Faxes>Add a Printer**).

Step 2 Select Local Printer. Make sure to uncheck Automatically detect and install my plug and play printer. Click Next.

Add Printer Wizard
Local or Network Printer The wizard needs to know which type of printer to set up.
Select the option that describes the printer you want to use:
Local printer attached to this computer
Automatically detect and install my Plug and Play printer
A network printer, or a printer attached to another computer
To set up a network printer that is not attached to a print server, use the "Local printer" option.
< <u>B</u> ack <u>Next</u> Cancel

Step 3 Select Create a New Port and select Standard TCP/IP port. Click Next.

Add Printer Wizard		
Select a Printer Port Computers communicate with printers through ports.

Q: Does the TEW-P1PG support Macintosh operating systems?

Yes, but you must assign the print server an IP address from a Windows based operating system first. Once that is done you can use LPR or LPD printing for the Macs and you can manage the print server by entering its IP address into a web browser. Also the printer must be a postscript printer.

Q: What is the queue name of the TEW-P1PG?

The queue name will be PS-xxxxx-P1. X being the actual number listed in the Port Name box. It is case sensitive.

Q: Why can't I see my printer status information?

Print servers are IEEE1284 bi-directional compatible. This means that data can be sent and received in both directions between the printer and the print server.

Toner status, paper level, etc., will not be communicated back to the PC. In order to get printer status information, the proprietary printer driver has **embedded code** that needs to be passed on to the print server, decoded, then interpreted by the print server. Trendware print servers do not support embedded driver codes. Trendware print servers, whether in Gateways or Stand Alone, are plain TCP/IP print servers.

Q: Why is my parallel printer, printing a lot of garbage characters?

1. Make sure that you have the latest print drivers for you printer.

2. Launch your web browser (such as the Internet Explorer 6.0 used in this manual). Then, type *http://192.168.0.1* (the default IP address) in the Address bar and press [Enter] to enter the Management screen of the Configuration Utility. Or use the IP address that you manually assigned to the Print Server. Go to Configuration on the top menu bar and System on the side bar. Change the Speed to Low and Save.
