

# ~~~~~USB Travel Speaker~~~~~

## ~How to Install~

- Power on your Computer
- Connect the USB connector of Speaker with the available USB slot on you computer
- Check if the USB connector is firmly connected with the computer
- Wait for you system to search and install driver for the speaker.

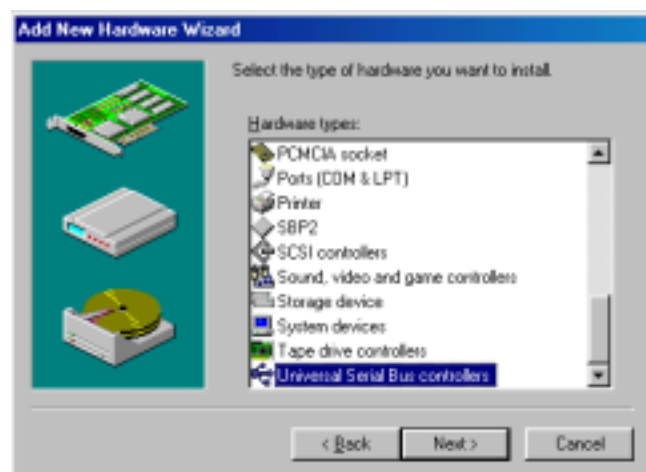

As for the Win 98, SE and ME user, you need to install the driver on the CD-ROM we provide.

- Follow the Cable connection steps to complete the Hardware install
- Click **Cancel** when **Add the New hardware Wizard** window appears.
- Insert the Driver CD we provide into the CD-Drive.
- This CD will Auto-run, please wait. If not, double click the CD-drive icon in My Computer Window.
- Follow the Software to install Driver and utilities (5.1CH Virtual sound).
- The PC will **reboot** when installation completes.

Note. If your windows OS can't find the device automatically, you need to activate it manually.

- Step 1. Double click the "My computer" icon to open the window.
- Step 2. Double click the Control panel to open it.
- Step 3. Double click the Add new Hardware icon
- Step 4. Select the Universal Serial Bus controller in the hardware list and Click "Next>".
- Step 5. Follow the wizard's instruction to install.

## ~How to Use~

---

### ***Placement:***

- a. Pull out the stand in the back of the speaker
- b. Place the speaker on a flat surface

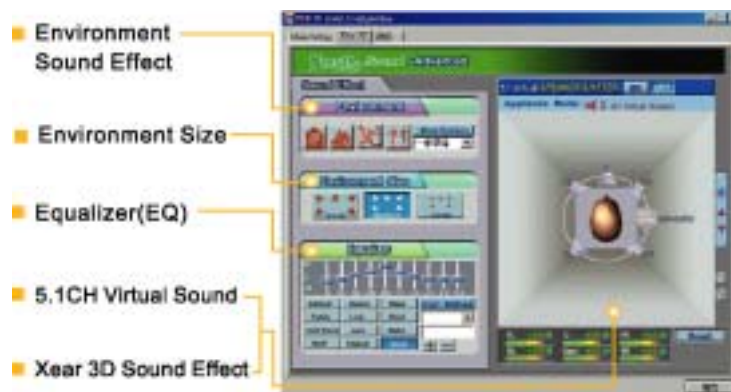

### ***Volume Adjustment***

You can adjust the Speaker Volume with Windows Volume Control. Sometimes turning off the volume is the reason why you think the speaker doesn't work

### ***5.1 CH Virtual Sound "Sound Effect"***

The Sound Effect will create the 5.1 CH Virtual sound effect, so you can enjoy the effect without a lot of speakers. It not only saves your money but also saves your time to setup the speakers.

### ***Trouble Shooting:***

To avoid the computer system unstable, do not unplug the USB connector when Media Player is running. If any unstable situation did happen, just restart the computer and then you can enjoy your favorite music.
