Q1. How come I cannot see any light from any of my LED's?

A1. Your TEG-S2400i/TEG-S2600i is not getting any power. Make sure that your surge protector or your outlet is getting power and make sure that the AC Power cord is properly connected to your switch.

Q2. After connecting several workstations to the switch, I have all workstations communicating with the server, but I cannot access the switch's web configuration utility. What should I do?

A2. Please change your switch's IP address to match the network segment of your workstations. For configuring your switch's IP address, please consult the User's Guide.

Q3. I have connected several workstations into the switch, but one workstation does not connect to the network. The LEDs on one of the ports remain unlit, while the rest of the ports have blinking LEDs. What do I do?

A3. You either have a faulty network card or a faulty network patch cable. Make sure that your network card and network cable are functional.
