Firmware Upgrade Procedures

1. Save the downloaded firmware file to your PC
2. Right click on the downloaded file and select **Extract All** or **Extract Here** option
    a. Make sure to remember the location where the extracted file will be saved.
3. Log into to the router's configuration page (default IP is 192.168.10.1)
4. Click on **Management** and click **Firmware update.**
5. Depending on your web browser, in the **Upload Firmware** section, click **Browse** or **Choose File**.

Firmware Update	
Current Firmware Version :	V1.0.0.0
Current Firmware Date :	03/26/2015-08:04:08
Select File :	Browse… No file selected.
Clear Config :	☐

6. Navigate to the folder on your computer where the unzipped firmware file (*.bin*) is located and select it.
7. Select **Clear Config** to reset the unit after firmware has been updated. Click **Update Firmware** to start the firmware upgrade process. If prompted, click **yes** or **OK**.
8. Log back into the TEW-81DRM and reconfigure the router as the previous settings has been reset back to default settings.

Note: Access the router's management page using the predefined settings found on the top or bottom labels.
