

## Firmware Upgrade Procedure

1. Save the downloaded firmware file (.zip) to your PC
2. Right click on the downloaded file and select **Extract All** or **Extract Here** option
  - a. Make sure to remember the location where the extracted file will be saved.
3. Log into the wireless access point configuration page (default IP address <http://192.168.10.100>)

**Note:** If you purchased the TEW-840APBO2K, the default IP address for one unit is 192.168.10.50 and the other unit default IP address is 192.168.10.51 which can be found on the label inside cover where the Ethernet ports are located.

4. Navigate to the **System Manager** section and click **Firmware**.
5. Under the **Firmware Upgrade** section click on **Browse** or **Choose File** and navigate directories to select where the extracted firmware file is located (Filename: TEW840APBO-int-X.X.X.X.bin). Once the firmware is selected, click **Upload** to start the firmware upgrade process.

## **Firmware Upgrade**

Current Firmware Version: 1.0.0

Select the new firmware from your hard disk.

Choose File

TEW840APBO-...0.0.6.bin

Upload

6. Wait until the firmware upload has completed and the device reboots.
7. The firmware upgrade is complete.
