

Firmware Upgrade Procedure

Upgrade through user interface

1. Log into to the access point configuration page (default IP is 192.168.10.100 or <http://tew-941apbo>)
2. Click on the **Management** and click on **Upload Firmware**.
3. Depending on your web browser, in the **Upload Firmware** section, click **Browse** or **Choose File**.

The screenshot shows a web interface for uploading firmware. At the top, there is a dark grey header with the word "Firmware" in white. Below the header, there is a light grey section containing a "Location" label on the left and a file selection button labeled "Choose File" with the text "No file chosen" to its right. At the bottom of this section, there are two buttons: "Apply" and "Cancel".

4. Navigate to the folder on your computer where the unzipped firmware file (*.bin*) is located and select it.
5. Click **Apply**. If prompted, click **Yes** or **OK**. Wait until the firmware upload completed and the device reboots.
