Q1: Can I connect or disconnect the USB cable while the computer is on?
    A1: Yes, you can connect or disconnect the USB cable, or any external USB device while the computer is on because the USB interface is Plug-and-Play and hot-pluggable.

Q2: I have a USB 1.1 cable. Can it work with USB 2.0 devices?
    A2: Yes, it works but it may cause problems for connecting high-speed USB 2.0 external peripherals. Therefore it is recommended that you use certified USB 2.0 cable.

Q3: After successful installation of the TU2-400E USB 2.0 Hub, I connected my external USB device to the USB port, but it doesn't seem to work. What should I do?
    A3: If you have an external AC power adapter that came with the external USB device, connect the AC power adapter to the device and power on the device. Also make sure that you have installed the correct driver for your external USB device in Windows.
