## Verifying the Driver Installation in Windows

To verify your Ethernet adapter installation, select **Control Panel > System > (Hardware) > Device Manager**. In the **Network adapters** group, **ASIX AX88772 USB2.0 to Fast Ethernet Adapter** should be displayed.

If there is a question or exclamation mark next to that item, then the driver is not properly installed. Please delete the item and repeat the installation steps.

\*The example screenshot is under Windows XP.

# Mac 10.4.x

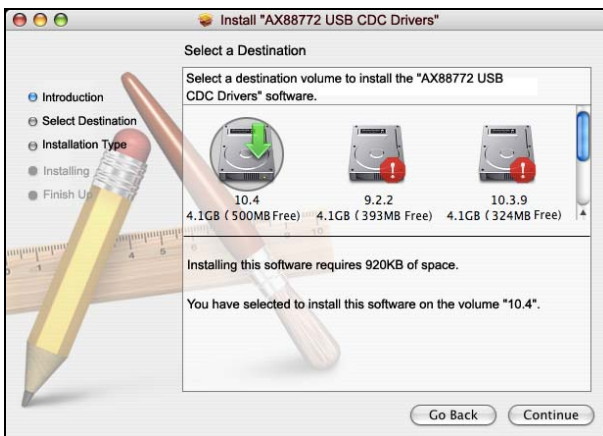

1. Insert the provided CD into your CD-ROM drive. Copy the archive file under the directory of **DriverMac10.4** to the desktop and then double-click the file until you locate the setup file.
2. Double-click the setup file **"AX88772"**.

3. When the welcome screen appears, click **Continue**.

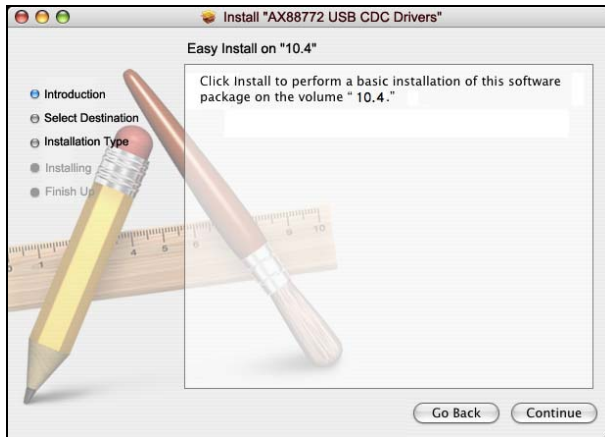

4. Select a destination disk to install the driver and click **Continue**.

5. Click **Continue** to start the installation.

6. When the **Authenticate** screen appears, enter your password in the provided field and click **OK**.

7. Click **Continue Installation**.

8. When the software was successfully installed, click **Restart**.

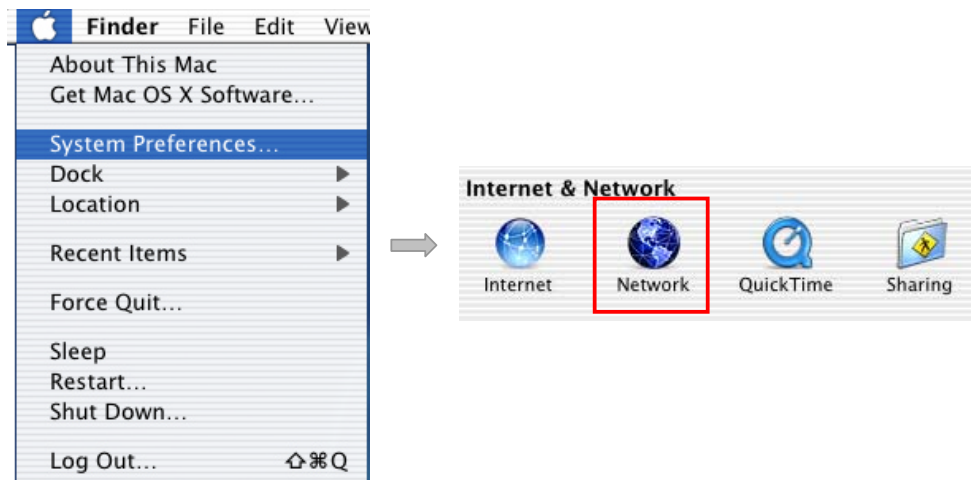

9. After the restart, plug the Ethernet adapter's USB cable into an available USB port on your computer. Then attach one end of an Ethernet cable to the Ethernet port on the adapter and the other end to your network switch, hub or router.
10. Mac system will detect the new hardware and show the name of the adapter, e.g. Ethernet Adaptor (en1) as in the example below.

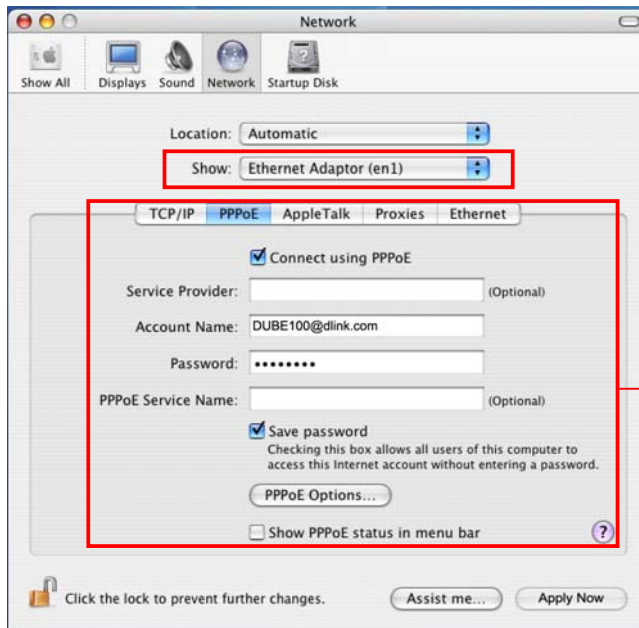

## Configuring Network Settings and Making a Connection

1. To configure the network settings of adapter, click the **Apple** icon and select **System Preferences**. Then double-click the **Network** icon.

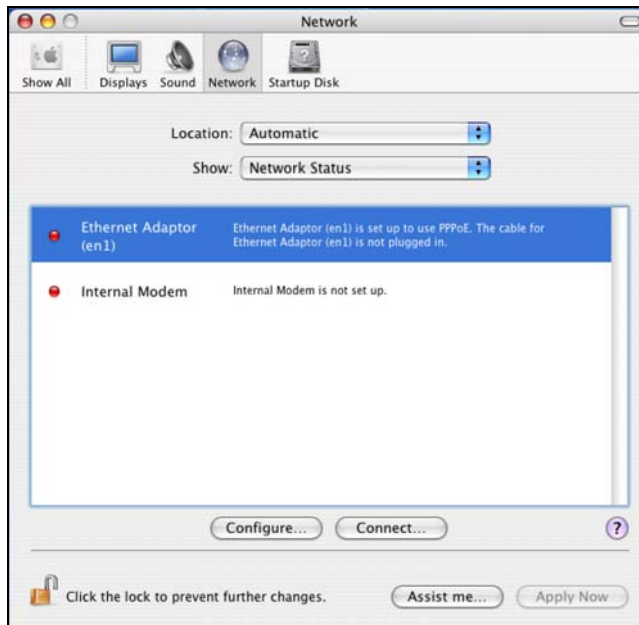

2. From the **Show** drop-down list, select the adapter to be configured, e.g., **Ethernet Adaptor (en1)**. Configure the network settings as required by your network and then click **Apply Now**.

Configure the network settings as required by your network environment.

3. To make a connection, select **Network Status** from the **Show** drop-down list and highlight the adapter representing the USB Ethernet adapter and click **Connect** to establish a network connection.

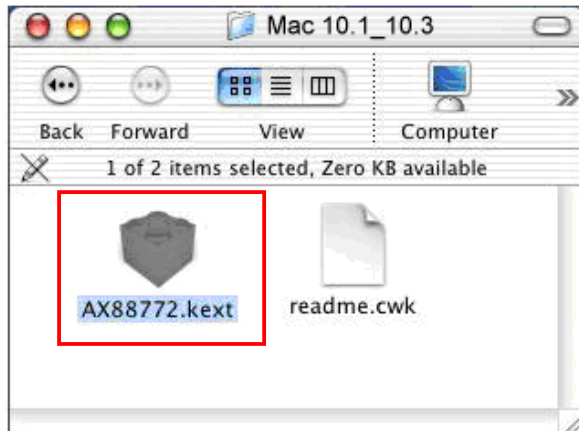

## Mac OS X 10.1.x ~ 10.3.x

1. Insert the provided driver CD into your CD-ROM drive. Double-click the CD and navigate to the directory of **/Driver/Mac10.1\_10.3**.

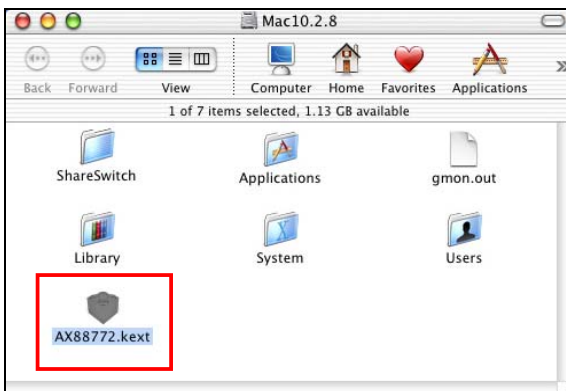

2. In the directory of **Mac10.1\_10.3**, select and copy the folder named **AX88772.kext**.

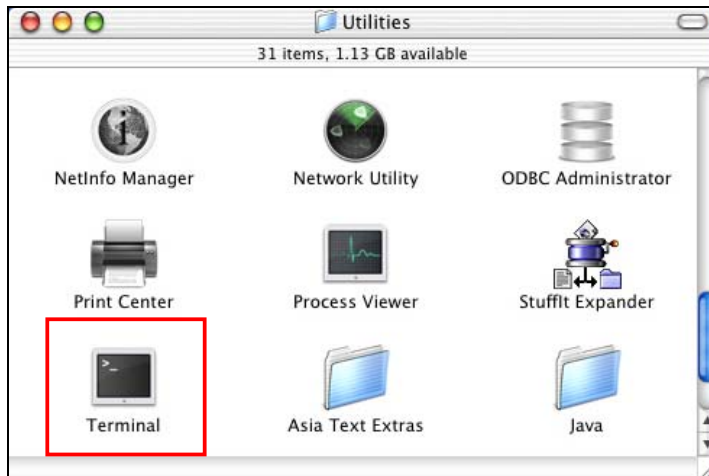

3. On the desktop, double-click the start-up drive.

4. Paste the **AX88772.kext** to the root directory of the disk.

5. Open the terminal application by clicking **Go > Application > Utilities > Terminal**.

6. If there is one old driver in the **Extensions** directory, please remove it first by executing the command:

```
sudo rm -R /System/Library/Extensions/AX88772.kext
```

You will need to enter your password as prompted.

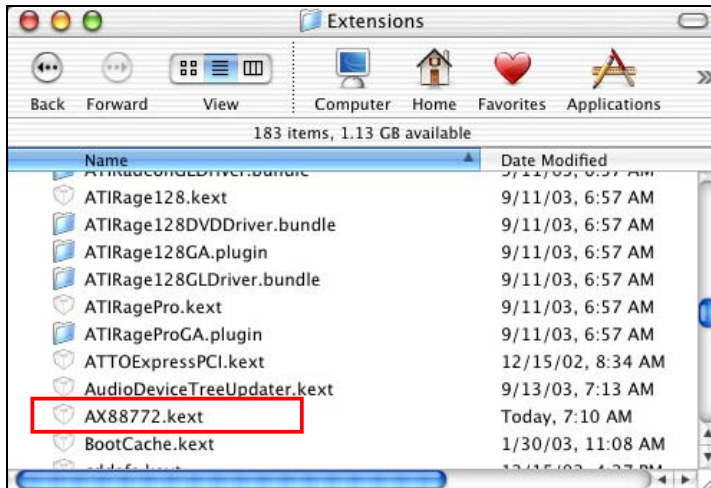

7. Paste the driver to the **Extensions** folder by the command line below:

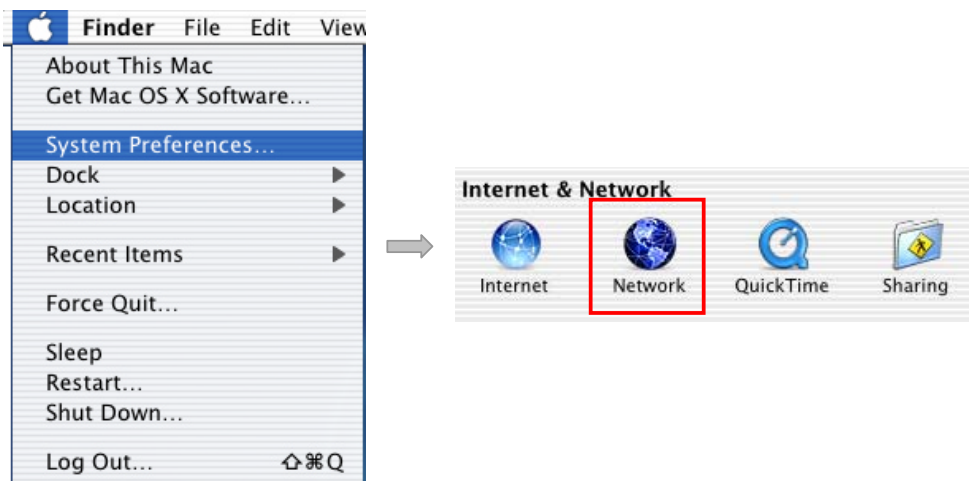

```
sudo cp -R //AX88772.kext /System/Library/Extensions/AX88772.kext
```

To verify the installation, you can go to **/System/Library/Extensions** to check if **AX88772.kext** is present.

8. Connect the Ethernet adapter to a free USB port.
9. Reboot your Mac.
10. Start **System Preferences** and select **Network**.

11. You will find that a new Ethernet network interface is available. It's usually named **Ethernet Adapter (en1)** or **Ethernet Adapter (en2)**.

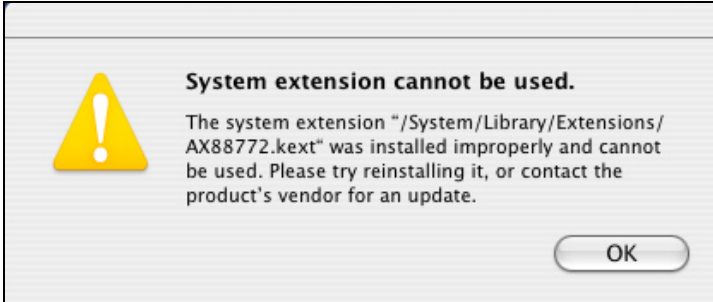

Now you are ready to configure the network settings for network access.

You must use the command line to install the driver as instructed above. Simply copy and paste **AX88772.kext** to the **Extensions** folder will lead to an improper installation as the warning message below:
