Troubleshooting

1. My computer does not recognize the TU3-SA. What should I do?

- 1. Verify that the computer meets the minimum requirements as listed in section 1.
- Make sure that you have plugged in the power adapter into the unit and the power cord into an available power outlet.
- 3. Access the device manager and verify the TU3-SA is installed properly.
 - 1. To access the device manager on Windows 7, click on the Windows icon on the bottom left-hand corner, click Computer, click System Properties and then click Device Manager. Double click on Universal Serial Bus Controllers. Make sure that USB Mass Storage Device is listed and there is no yellow question mark or exclamation point.
 - To access the device manager on Windows Vista, right-click Computer, click Properties and then click Device Manager. Double click on Universal Serial Bus Controllers. Make sure that USB Mass Storage Device is listed and there is no yellow question mark or exclamation point.
 - 3. To access the device manager on Windows XP, right-click My Computer, click Properties, click the Hardware tab, and then click Device Manager. Right click on My Computer→ Properties. Double click on Universal Serial Bus Controllers. Make sure that USB Mass Storage Device is listed and there is no yellow question mark or exclamation point
- 4. Try plugging the device into a different USB port on your computer.

2. How do I format my brand new hard drive with the TU3-SA?

- For Windows 7/Vista, right click on Computer or My Computer and select Manage. When the Computer Management screen appears, click on Disk Management. Right click on the hard drive and click New Simple Volume. Follow the New Simple Volume wizard and then click Finish.
- 2. For Windows XP, go to Start → Settings → Control Panel → Administrative Tools → Computer Management → Disk Management. If the Initialize and Convert Disk Wizard appears, click Cancel. Right click the Unknown drive, click Initialize and then click OK. Right click on the unallocated region of the hard drive and select New Partition. Follow the New Partition Wizard instructions then click Finish. The hard drive will automatically start the formatting process.

Note: Make sure that the selected hard drive is not your C or D drive. Also make sure that the selected hard drive is connected to the TU3-SA.

3. My computer does not list any drives? What should I do?

- 1. Access the device manager and verify the hard drive is installed properly.
 - 1. To access the device manager on Windows 7, click on the Windows icon on the bottom left-hand corner, click Computer, click System Properties and then click Device Manager. Double click on Disk Drives. Make sure that USB Device is listed and there is no yellow question mark or exclamation point.
 - 2. To access the device manager on Windows Vista, right-click Computer, click Properties and then click Device Manager. Double click on Disk Drives. Make sure that USB Device is listed and there is no yellow question mark or exclamation point.
 - 3. To access the device manager on Windows XP, right-click My Computer, click Properties, click the Hardware tab, and then click Device Manager. Right click on My Computer → Properties. Double click on Disk Drives. Make sure that USB Device is listed and there is no yellow question mark or exclamation point.
- 2. If you are attaching a brand new hard drive, format the drive. Please refer to question 2 for more information
