2. Hardware Installation and Configuration

1. Do not install or mount the IP camera until after you complete the installation steps below. Temporarily place the IP camera near you and connected to a network.
2. Download and Install the TRENDnet Mira app on your mobile device, then open the app.

Note: Please connect your mobile device to the Wi-Fi of the same network of which the camera will be connected to.

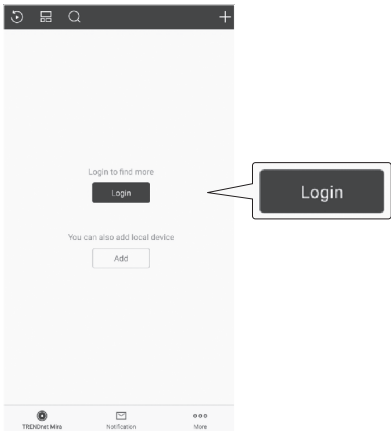

3. Once you open the app, it will ask you to **Select Country or Region**. Please select your country or region and proceed to the login page.

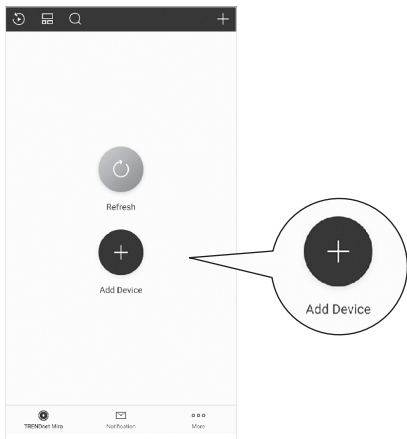

4. Once you open the app, click the **Login** button.

Note: if you do not have an account please takes the steps necessary to create one.

5. Once you login, click the **Add Device** button.

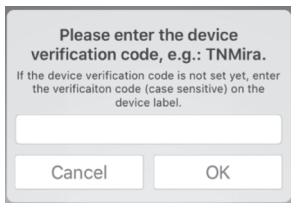

6. After clicking **Add Device**, you will then have to scan the QR Code on the label of the camera with your mobile device.

7. Once you scan the QR code you will be asked to press **Next**.

8. Please enter the verification code. Default code is **TNMira**.

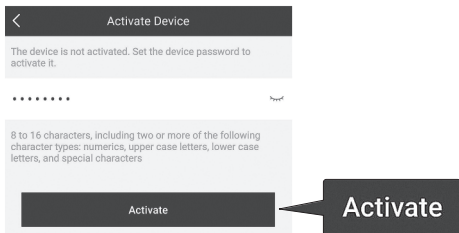

Please enter the device verification code, e.g.: TNMira.

If the device verification code is not set yet, enter the verification code (case sensitive) on the device label.

Cancel OK

9. To activate a new device, you will need to create a password and press **Activate**.

< Activate Device

The device is not activated. Set the device password to activate it.

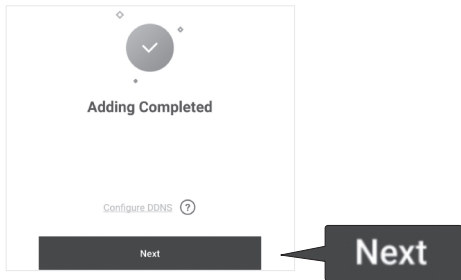

.....

8 to 16 characters, including two or more of the following character types: numerics, upper case letters, lower case letters, and special characters

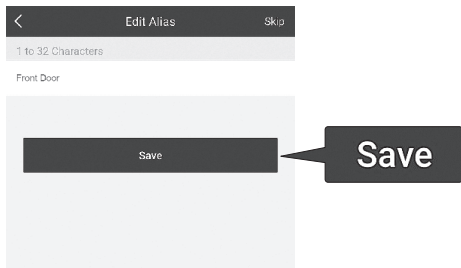

Activate

Activate

10. Adding has been completed, Press **Next**.

11. Edit Alias of your camera and press **Save**. After this step you will be taken to the live view of your camera.

12. Once added you should see a live image from the camera and you are finished.

Mounting the camera

1. Place the provided template label on the wall or ceiling.

2. Drill holes at each marked position on the template. Make sure the drill bit matches the size of the holes on the template.
3. (Dome) Remove the dome cover using the provided Torx security allen key.

*** Do not remove silica packet from camera!**

4. Insert the screw anchors into the holes, and align the mounting base over them. Then use the provided screws to secure the camera to the mounting surface.

- 4A. (Bullet) Manually adjust your camera to the desired viewing position.

- 4B. (Dome) Manually adjust your camera to the desired viewing position. When finished, attach the dome cover back on the dome using the Torx security allen key.
