

TV-IP751WC / TV-IP751WIC / TV-IP851WC / TV-IP851WIC

Camera Firmware Upgrade Procedures

Warning:

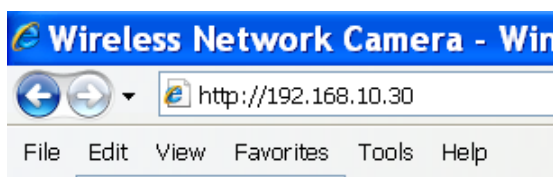

- Always upgrade firmware with a wired connection.
- Do not interrupt the connection while doing the firmware upgrading
- Save your configuration before firmware upgrade

Note:

- 1) TV-IP751WC is used for below procedures; other cameras follow the similar route.
- 2) It is necessary to perform a factory reset after the firmware upgrade. If you would like to keep your original setting, please back up your configuration first prior to upgrade the firmware as instructed at the last page.

Firmware Upgrade

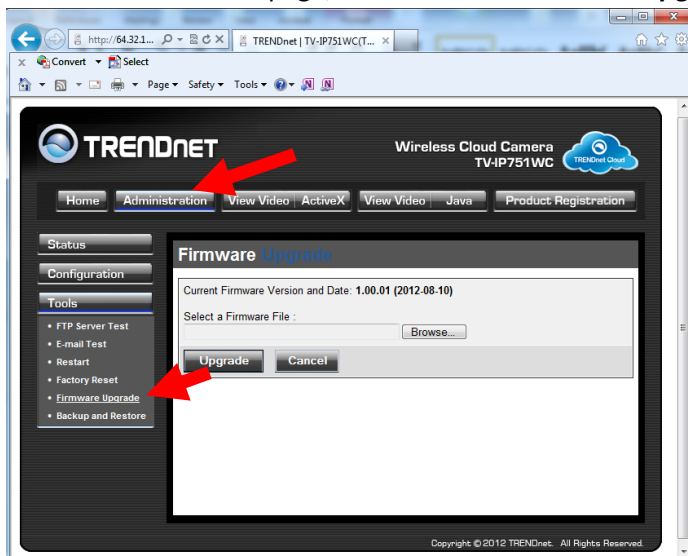

1. Download and unzip the firmware file from www.trendnet.com/downloads . Save the firmware on your computer. The firmware file name ends with *.bin.
2. Open a browser and go to your camera's IP address: to find the camera IP, please use the Setup Wizard, on the CD-ROM under the menu folder (default is 192.168.10.30, without a DHCP server.)

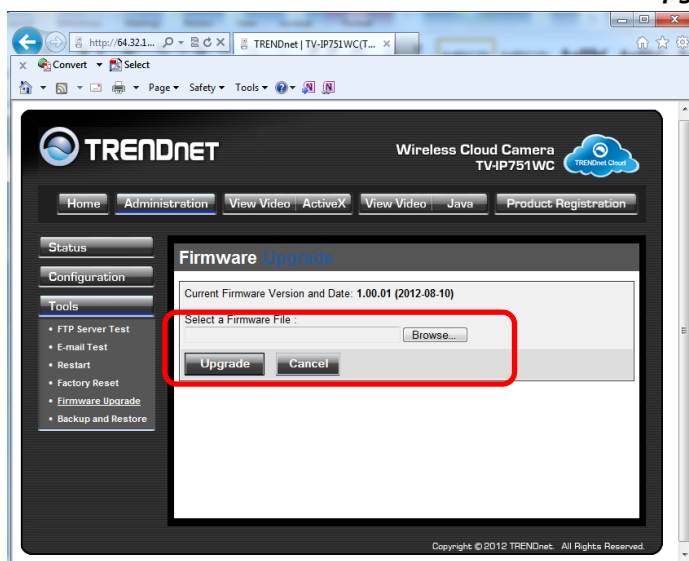

3. Enter the username & password (By default, the username & password is admin/admin, or enter the password setup by you.)

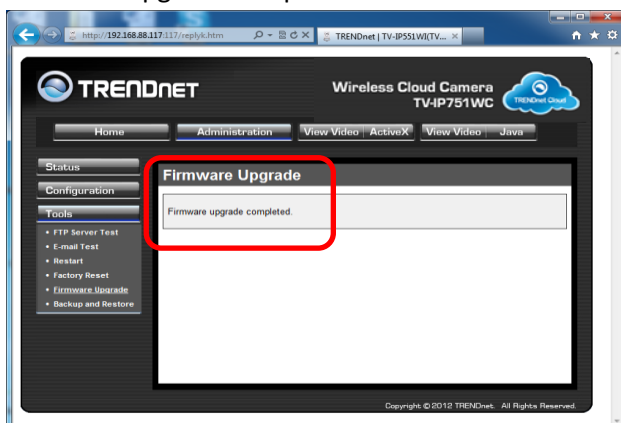

4. Go to **Administration** page, **Tools** tab then **Firmware Upgrade** option

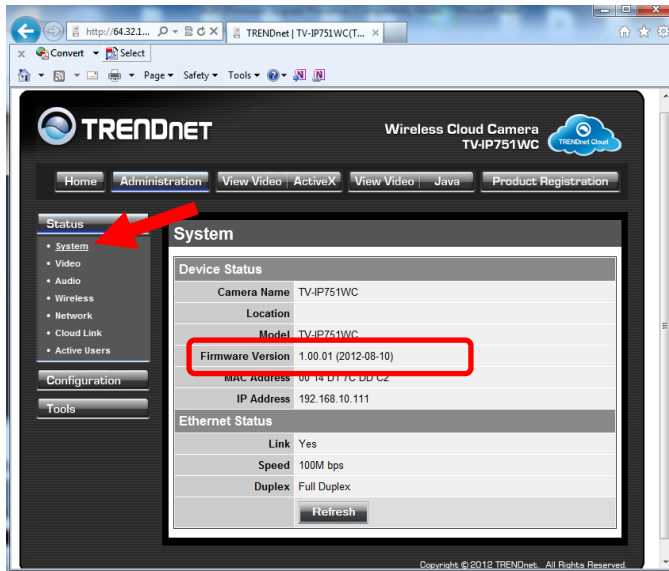

Click **Browse** to select the new firmware file then click **Upgrade**.

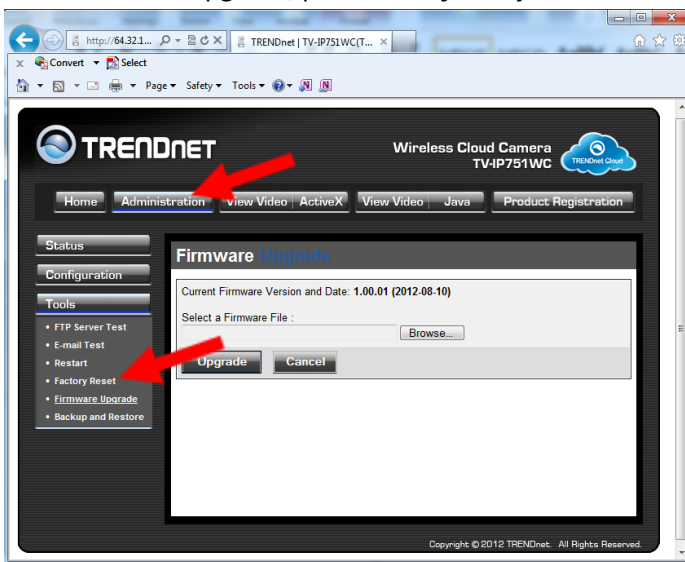

5. Firmware upgrade completed.

6. After reboot, click **Status/System** tab again to check the new firmware version.

7. After firmware upgrade, please click **factory reset**

8. Your firmware upgrade is now completed. To find the camera IP, please use the Setup Wizard (can be found on the CD-ROM) to search and configure your camera again.

9. **Back up**

To keep your original settings prior to the firmware upgrade, please **back up** the config.cfg file and save the file to your chosen folder before the firmware upgrade starts.

Restore

After the firmware upgrade completed, then **Restore** the config.cfg file and your original settings will be restored.

Browser window showing the TRENDnet Wireless Cloud Camera TV-IP751WC configuration page. The URL is <http://192.168.10.102/backup.htm>. The page title is "TRENDnet | TV-IP551W(TV-...".

The interface includes a navigation bar with tabs: Home, Administration, View Video, ActiveX, View Video, and Java. The "Administration" tab is selected.

The left sidebar contains the following menu items:

- Status
- Configuration
- Tools
 - FTP Server Test
 - E-mail Test
 - Restart
 - Factory Reset
 - Firmware Upgrade
 - Backup and Restore

The main content area displays the "Backup and Restore" section. It contains two sub-sections:

- Backup Device Configuration to File**
 - Do you want to backup the configuration to file?
 - Backup button
- Restore Device Configuration from File**
 - Select a Configuration File :
 - Browse... button
 - Restore button
 - Cancel button

Red arrows point to the "Administration" tab, the "Backup and Restore" menu item, the "Backup" button, and the "Restore" button.
