

Installation

1

Tap on the App Store icon to download and install TRENDnetVIEW app. Once installed, tap the SecurView icon to open up the app.

Note: iOS must be version 5.0 or higher.

Remote Camera Setup

Note: It is recommended that you setup a dynamic DNS service in order to view your cameras remotely. See your router and IP camera's user's guide for instructions.

1

- Tap the **Manually Add Camera** icon at the upper right corner of the screen.

2

- Enter the camera's Name, Host Name, remote IP address (e.g. 65.65.65.65) or Dynamic DNS address, Port number, and Username and Password. Tap the **Save** icon to finish.

3

- After the selected camera has been added, TRENDnetVIEW will return to the Camera List screen. Repeat steps 2-3 to add more cameras.

View Video

Note: It is recommended that you setup a dynamic DNS service in order to view your cameras remotely. See your router and IP camera's user's guide for instructions.

1

- Check the desired cameras. Tap the Check icon at the bottom left corner to select all cameras. Tap the **View Video** icon at the bottom right corner to view video.

2

- Swipe the video pane to view other cameras. Swipe the thumbnail pane to see thumbnail view of all cameras.

3

- Rotate the iPhone horizontally to view the video in landscape mode.

4

- Pinch the screen to zoom in and zoom out.

5

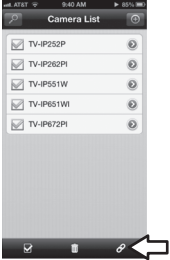

- In landscape mode, tap the screen to bring up the function toolbar.

6

- Above is the function toolbar. Buttons include: pan and tilt, snapshot, enable/disable microphone, enable/disable speaker, refresh and information. If the button is greyed out, the IP camera does not support that function.

Change Video Aspect Ratio

1

- Tap the **View Video** icon at the bottom right corner to view video.

2

- Tap the **Settings** icon at the upper right corner of the screen.

3

- Tap **Video** to change the aspect ratio.

4

- Select **Stretch to screen** or **Original aspect ratio** and then tap the **Back** icon.

5

- Tap the **Back** icon at the upper left corner of the screen.

6

- The top image illustrates the stretch to screen option. The bottom image illustrates original aspect ratio option.

In-app Upgrade

Note: The In-app Upgrade unlocks the following features:

- Recording to mobile device
- Split Screen
- Quad View
- Auto Scan

Split Screen and Quad View (In-app Upgrade Required)

- Double tap the video.

- In portrait mode, you can view up to 2 cameras at a time. Swipe to the left to view more cameras.

- Rotate the camera horizontally to view video in landscape mode. In landscape mode, up to 4 cameras can be viewed at once. Swipe to the left to view more cameras.

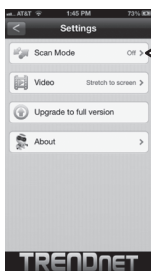

Scan Mode (In-app Upgrade Required)

1

- Tap the **Settings** icon.

2

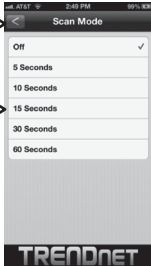

- Tap **Scan Mode**.

3

- If you have not yet purchased the full version, please tap **Upgrade**.

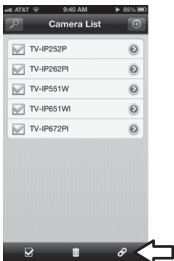

4

- Select the desired option and then tap the **Back** button.

Recording (In-app Upgrade Required)

1

- Tap the **View Video** icon at the bottom right hand corner to view video.

2

- Swipe the video pane to select the desired camera and then tap the **Record** button.

3

- If you have not yet purchased the full version, please tap **Upgrade**.

4

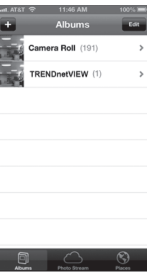

- **REC** (blinking red) indicates that video is being recorded. Tap the **Record** button to stop the recording.

5

- Tap the **Photos** app.

6

- In the Albums tab, tap **TRENDnetVIEW**.

Local Camera Setup

Note:

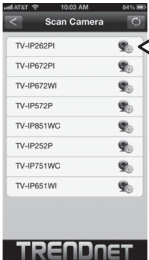

- Before proceeding, you must establish a wireless connection to the network where your IP cameras are installed.
- This method will not allow you to see video while away from your local network. Remote camera setup is recommended.

1

• Tap the **Scan Camera** icon at the upper left corner of the screen.

2

• Tap the **Add Camera** icon next to the cameras you want to add.

3

• Enter the camera's Username and Password and then tap the **Save** icon.

4

• After the selected camera has been added, TRENDnetVIEW will return to the Scan Camera screen. Repeat steps 2-3 to add more cameras.
